

DAKSH TOOLING SOLUTIONS.

Turning Complex Designs into Tangible Reality

Our Expertize

DESIGN & MANUFACTURING OF TOOLS & DIES | PROTOTYPING | MACHINING | PRESSED PARTS | INJECTION MOLDING | PDC | GDC

Innovative Partner for Tooling, Molded & Pressed Parts

DAKSH TOOLING SOLUTIONS is a technology-driven manufacturer specializing in high-precision Tools, Dies, Molded & Pressed parts for automotive, industrial, and other engineering sectors. State of the art in-house Tool Room is an added advantage making us specialized in precision tooling & parts. Our focus is on delivering engineered components that meet stringent performance requirements through advanced manufacturing processes, robust quality systems and end-to-end service delivery.

About Us:

Established in **April 2019**, **DAKSH TOOLING SOLUTIONS** is a fast-growing precision engineering organization

Located at **Chinchwad, Pune**, a strategic automotive manufacturing hub

Serving leading **OEMs, Tier-1 and Tier-2** automotive suppliers in **India & Overseas**

Built on a strong philosophy of **Process Excellence, discipline, and customer focus**

Our Purpose & Direction

Mission

To advance precision manufacturing by combining engineering excellence, continuous improvement, and collaborative partnerships to deliver consistently high-quality products and services.

Vision

To be recognized as a benchmark manufacturer in Precision Tools , Molded Stamped Parts—delivering outstanding products and dependable services that create premium value for our customers through innovation, reliability, and first-time-right performance.

Our Capabilities :

Injection Mold, Stamping Dies:

- Tailored Precision Solutions for Automotive, Medical, and Engineering Industries
- Precision molds, casting dies, and press tool ensures that we meet the specific needs
- Leveraging cutting-edge technology and extensive industry expertise, we help our clients drive innovation and efficiency.

Molded Parts:

- High Quality Molding capabilities using modern molding technology for General & Engineering Plastic Materials
- Combination of Horizontal & Vertical Molding Machines for wide range of product categories
- Integration of stamped metal inserts into over-molded plastic parts to create hybrid assemblies.

Stamped Parts:

- High-speed stamping capabilities using modern press technology for ferrous and non-ferrous metals
- Progressive and compound press operations tailored to complex part geometries
- We ensure superior die quality through the combined strength of our in-house leading edge CNC fleet and versatile conventional equipment's

How We Achieve Excellence in Tooling Quality:

Fin-Free Casting & High Yield

Advanced Tooling Durability

Uniform Heating & Core Simulation

State-of-the-Art Infrastructure

Specialized Handling & Assembly

- **Precision Engineering for Maximum Foundry Efficiency**

- **Fin-Free Results:** We maintain minimal core-to-core and core-to-mould clearances with high-accuracy tooling.
- **Expert Gating Design:** Our designers collaborate with your foundry to engineer gating systems that ensure higher yields.
- **Dimensional Stability:** We prove our tooling during initial stages of core and mould making to ensure perfect stability.

- **Built for 2 Lakh Shots & Beyond**

- **Premium Materials:** We use special die steel for cavity inserts combined with advanced plating and heat treatments.
- **Guaranteed Performance:** We assure a tooling life of 2 lakh shots.
- **Maintenance Support:** Under an AMC, tooling is recalled every 50,000 shots for professional reconditioning.
- **Foundry-Friendly Design:** Engineered for ease of maintenance so foundry staff can follow checklists and increase tool life.

- **Advanced Technology for Zero Rejections**

- **Latest Technology:** Our uniform heating eliminates core box warpage and core distortion issues.
- **Core Simulation:** We perform advanced simulations to achieve improved core quality, productivity, and consistency.
- **Reduced Waste:** Better thermal management leads to reduced core and casting rejections.

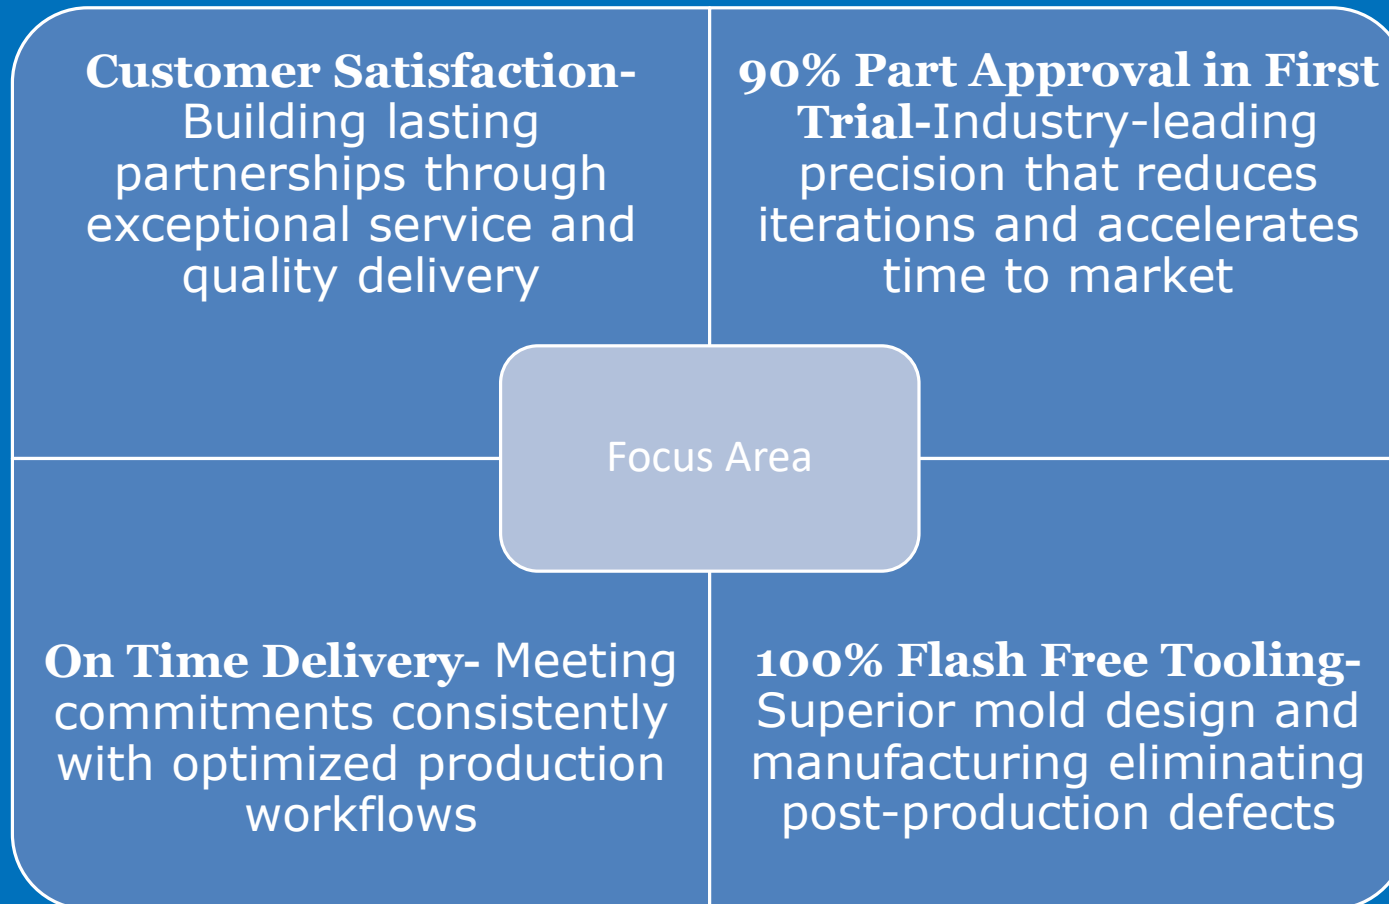

- **Precision Machining Through Advanced Workmanship**

- **Advanced Equipment:** Our facility features 5-Axis machining centres and Gantry-type VMCs with 22,000 RPM.
- **Intricate Machining:** We utilize double-head EDM and large-size wire-cut machines for superior accuracy.
- **98% Blue Matching:** Using a 200-ton die spotting press, we ensure excellent core box parallelism and flatness.
- **No Manual Work:** Our technology eliminates manual blue matching and ensures superior workmanship.

- **Comprehensive Solutions for Foundry Productivity**

- **Dedicated Fixtures:** We provide custom fixtures for core handling, assembly, and drilling.
- **Quality Preservation:** These fixtures reduce core damage and improve overall dimensional stability.
- **Expert Design Team:** Our designers and skilled assembly team focus on making "foundry-friendly" tools to maximize productivity.

Strategic Focus Area:

Our Competitive Edge:

Engineering Excellence

- Deep domain experience with a focus on precision, performance and reliability.

Integrated Manufacturing

- Single-source delivery of tooling, molding, stamping and assemblies — reducing lead times and risk.

Cost & Value Optimization

- Optimized processes and equipment ensure competitive pricing without compromising quality.

Customer-centric Service

- Collaborative project development, responsive support and on-time delivery commitment.

Tooling Excellence – Our Core Strength:

High-Precision Tool Manufacturing

- State-of-the-art machines for precision tool, die and mold manufacturing
- Strong expertise in tool design, development, and optimization
- In-house tooling ensures shorter development cycles and superior part quality
- Focus on tool life, consistency, and ease of maintenance

Tooling is not a support function at **DAKSH TOOLING SOLUTIONS** — it is our competitive advantage.

Machinery & Equipment's: **DAKSH TOOLING SOLUTIONS**-Pune

Sr No.	Machine	Model	Specification	Staus	Quantity
1	CNSKITEK- Twin Head C Edm	STM	1100X1100X800X800X500X500 (XYZ)	Installed	1
2	CNC Double Column Machine DL2114	STM	2100X1400X800 (XYZ)	Installed	1
3	Vertical Machining Centre VC-Ez 410 Ip	MAZAK	762X410X510 (XYZ)	Installed	1

1	CAD Workstations			Installed	3
2	CAM Workstations			Installed	2

Precise Metal Working Machines

STM CNC Double Column Machine

Make: STM

Bed Size: 2100×1400×800mm (XYZ)

Heavy-duty machining for large-scale tool and die work with exceptional rigidity and accuracy.

Vertical Machining Centre :-VL1570

Make: STM

Bed Size :- 1500X700X700(XYZ)

Wire Cut Machine:-NP1060L

Make:- EXCETEK

BED SIZE:-1500X1000X500

5 Axis Swivel Head Rotary Table CNC Mill

Make: Hurco

XYZ Axis Travel: 1524X660X610mm

Twin Head CNC EDM:

Make: STM

Bed Size: 1100×1100×800 / 800×500×500 (XYZ)

Equipped with twin head for higher productivity

Vertical Machining Centre: Takumi H12E

Make: Takumi

Bed Size: 1360 X960 mm

delivers exceptional rigidity and thermal stability for high-precision, high-speed machining, ensuring consistent accuracy and superior surface finishes

VMC Machine (BFW CHAKRA 60+)

Make:- BFW

Bed Size:- 1100X600X600(XYZ)

Vertical Machining Centre VC-Ez 410 IP

Make: MAZAK

Bed Size: 762×410×510mm (XYZ)

High-precision VMC for complex 3D machining operations with superior surface finishes.

Die Spotting Machine: SX200 YC

Make: Sprex

Bed Size: 2100×1800 mm

Capacity: 200 Ton

VMC Machine (VM10i)

Make:- HURCO

Bed Size:- 660X406X508 (XYZ)

Dedicated for Graphite Machining

Advanced Quality Inspection Facility:

**HEXAGON –
PORTABLE
LASER SCANNER**

CNC VISION MEASURING MACHINE
SIZE:-400X300X200mm
MAKE:- ELECTRONICA
QTY:- 01

DIGITAL HEIGHT GUAGE
SIZE:-Z-450 MM
MAKE:- ELECTRONICA
QTY:- 01

Our quality assurance is supported by **advanced inspection and measurement systems** like Laser scanner, VMM to ensure dimensional accuracy and consistency across dies, molds, patterns, and machined castings. **In-process and final inspections** are seamlessly integrated with manufacturing to minimize deviations, reduce rework, and ensure reliable performance at customer end.

Advanced Machinery & Equipment's

Turning Complex Designs into Tangible Reality

We ensure superior part quality through the combined strength of our leading edge Manufacturing Machines & skilled Manpower

Esteemed Customers: (Tools & Components)

(Through Minda Vast)

Quality Systems:

- ISO 9001:2015 certified quality management system
- Structured quality checks at **incoming, in-process and final inspection stages**
- Strong focus on **process control, traceability and corrective actions**
- Continuous improvement culture aligned with customer quality expectation

Achievements:

- ❑ 250+ Mold & Dies delivered in last one year
- ❑ 90% success in first trial approval
- ❑ Zero Accident Record for last 600+ days (since inception)
- ❑ ISO 9001: 2015 Certified

Future Roadmap:

- ❑ To acquire IATF-16949 Certification by 2027
- ❑ Upgrade to AI Based ERP System – Jan 2027
- ❑ Export Readiness –FTA Compliance – Dec 2026
- ❑ Quality Lab –Dec 2026
- ❑ Capacity Expansion to achieve the Sales Target – In Process
